

## *WARRENYACHTS PRESSRELEASE*

---

*New Warren S87 Sport Yacht has arrived.  
Her beauty, engineering perfection and breathtaking performance are a  
shamelessly seductive combination.*

**January 19, 2006.** *Warren Yachts, a division of Shipworks Group, Brisbane, Australia, announces the arrival S87 Sport Yacht. This is the first in of a series of breakthrough Sport Yachts that Warren is building in fiberglass at their new 15-acre site on the Brisbane River. The new S87 will be available, by appointment, on Collins Avenue, during the Miami International Boat Show*

*“The new S87 is designed to appeal to the most sophisticated international tastes,” said Dave Warren, founder of Warren Yachts. “She is the sport yacht, evolved to a higher and more elegant form. The detail, quality and finish we have achieved is as good as that of the world’s finest custom yachts.”*

*The S87 is the product of the focus and values of a true custom shipbuilder. For over 20 years, Warren Yachts has been Australia’s leading builder of advanced design custom sport yachts and motor yachts. Admired for styling and uncompromised standards, Warren Yachts have consistently been on the cutting edge of design and construction technology. Warren was one of the first builders in the world to create and produce the sport yacht in its modern form. Over 15 years of improvements and refinements have resulted in the new Sport Yacht Series. Both Open and Flybridge models in 77 and 87 feet are available in a variety of three and four stateroom configurations. A wide selection of power and drive options that include: conventional, surface piercing and water jet, can produce top speeds of up to 60mph.*

*The new S87 was conceived and designed to drive and feel more like a sports car than an 87-foot yacht. A low center of gravity results in superior handling and stability. In all aspects of performance she behaves like a thoroughbred. The helm responds instantly, acceleration is quick, smooth and quiet, lift to plane is effortless, turns are flat and controlled, tracking is straight. If the beauty and style of the S87 doesn’t get you, the performance will.*

*Throughout the S87, all floors, machinery and systems are rubber-cushion mounted. Vibration and noise have been reduced to an absolute minimum or completely eliminated. All cabinetry doors and drawers are silenced with soft-close pistons.*

*Elegance and functionality coexist beautifully on the S87. Below, woods of the finest burl and grain are perfectly fit and flawlessly finished. Black granite, curved glass, sculptured stainless steel, high gloss metallic silver and soft leather are the focal elements of the dramatic interior. Elegance and functionality are found in abundance in this very private, amenity-rich environment. The passions and pleasures of the few that seek perfection on the water will find it in the new Warren S87 Sport Yacht.*

*Shipworks Group, Warren Yachts facility in Australia, with new build capacity to 300 feet, is the largest, newest, most advanced shipyard in the hemisphere.*
